Inter-State Milk Members Back Increased Promotion

Philadelphia — Problems as general as the United States Import Policy and as specific as improved milk handling at the store level were discussed at the 51st annual meeting of Inter-State Milk Producers' Cooperative, Tuesday and Wednesday, November 19 and 20.

Dr. Carl S. Winters, world traveler and former head of one of the greatest Baptist churches in America, cautioned against the misuse of "drugs and such other devices" as an escape in this confused and unsettled period of our history, and said this "escape pattern" is of international scope and not only an American problem.

Speaking at the banquet for 700 persons, Tuesday evening, November 19, Dr. Winters said that "you," the people of this nation, are the people who have the ability needed to guide the world.

The 118 delegates, representing 3300 dairy farmers in Delaware, Maryland, New Jersey

and Pennsylvania, passed a resolution on Wednesday, November 20, recommending that Inter-State take the initiative to study the merging of cooperatives for the purpose of improving the dairy farmer's position in the marketing place.

Wilbur Seipt, president of Inter-State, opened the annual meeting by emphasizing to the

Ayrshire Breeders To Hold Annual Business Meeting November 29

The Lancaster County Ayrshire Club will hold their Annual Meeting and Banquet on Friday, November 29, at the Lancaster Production Credit Building, 411 West Roseville Road. Starting time is 7:00 p.m.

The banquet style is a covered dish luncheon. Participants are asked to bring one hot and one cold dish and own place settings. Beverages and ice cream will be furnished. Officers will be elected in the business meeting.

Entertainment for the evening will be slides of South America by Frank Wilson of the National Ayrshire Office.

County 4-H Four Win Livestock Judging At Eastern Nation Expo

Lancaster County 4-H Youths compiled 1,900 team points out of a possible 2,000 in the Interstate Livestock Judging Contest at the Maryland State Fairgrounds last week to carry Pennsylvania to the top of the

ON THE DAIRY BARN REMODELING TOUR

(Left to right) Robert Clark, Quarryville R2 demonstrates his mechanical feed cart for Victor Plastow, Lancaster County Associate Ag Agent and Roger Grout, Ag Engineer Penn State. The Clark's feed their 97 Holsteins both short feed and silage in a matter of a few minutes with these mechanical carts.

Other stops on the tour Thursday, included Turkey Hill Dairy Farm, Conestoga R2, J.

Mowery Frey Jr. Farm, 401 Beaver Valley Pike; John Harbush Farm, 1036 Beaver Valley Pike, and James Kreider's Farm, Quarryville R1. About 60 dairymen went on the tour described by Grout as very successful.

ENTERS SECOND WEEK

Mystery Farm Contest

The much talked about and well accepted Lancaster Farming Mystery Farm Contest now enters its second week. As you know, the subscriber winning first prize will receive a personal check for \$100 and second and third place winners will be awarded \$50 and \$25 checks respectively.

Be sure to enter each week. If you didn't know the farm last week try this one. If you did, you got a head start. At any rate, you or one of your neighbors will be receiving that \$100 check just after the beginning of the new year.

A complete list of the contest rules and our address where you send your entries will be listed with the Mystery Farm each week. Be sure to follow them.

Last week's Mystery Farm from Southern Lancaster County

Funk Named To Soil And Water Commission

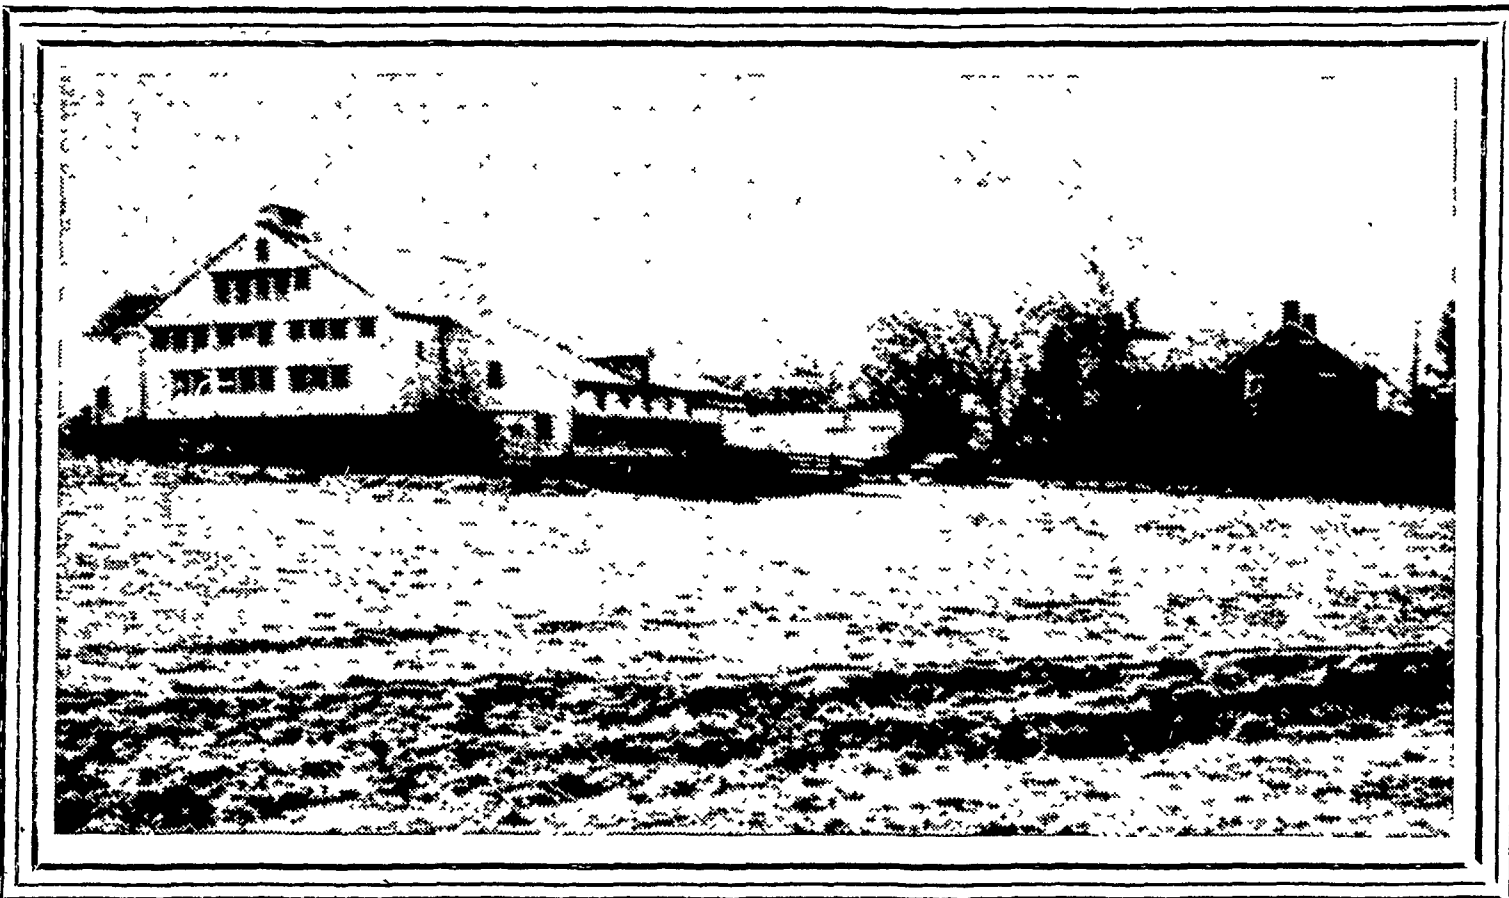

Gov. Raymond P. Shafer sent to the State Senate Tuesday the name of Amos H. Funk, Millersville R1, for re-appointment to the State Soil and Water Conservation Commission.

The appointment is subject to Senate confirmation.

Funk was first named to the commission by Gov. William W. Scranton in 1963 and reappointed in 1965. Terms on the commission are for two years.

Also renamed a former member on the commission by the governor was Robert C. Lott of Aspers R1, Adams County. T. A. Dorsch of Jersey Shore, Clinton County, was nominated as a new farmer appointee, while two others were nominated as new urban members: Vernon K. Shaffer, Reading, and William D. Lange, Clarks Summit, Lackawanna County.

Funk, a veteran conservationist, is rounding out his 16th term as county chairman for the conservation group. A fruit and vegetable farmer, he received the Lancaster Kiwanis Club's Farmer of the Year award in 1967.

MARKET NEWS REPORT

At Lancaster Yards

Weekly Review

November 22, 1968

CATTLE 4400 — Compared to last weeks close, slaughter steers mostly steady, some strength on high-Good and low-Choice; cows \$1.00-1.25 lower; bulls mostly steady; feeder steers steady to strong; Supply included 30 percent slaughter steers, 15 percent cows and bulls with the balance mainly feeder steers.

Eastern Shore Exchange

Broiler and fryer live prices averaged 14.41 cents a pound this week. Prices paid ranged from a high of 15.7 cents a pound on Monday to a low of 13.4 cents a pound on Wednesday. Total sales for the week were 497,000 head up 171,200 head from last week.

Try A Classified Ad

2,788 lbs. of pork to market from one litter in 156 days

That's the performance story of a litter of 13 pigs raised at Ful-O-Pep Research Farm. You can probably match or top this record by following the precision, maximum efficiency Ful-O-Pep program on your farm.

Ful-O-Pep proving ground
Here's how the 13-pig litter progressed. Litter was weaned at 3 weeks. At 4 weeks the pigs averaged 23 lbs each. Weighed again at 58 days of age, they averaged 50 lbs. At 156 days of age they topped the market averaging 215 lbs. per pig for a total of 2,788 lbs. Good hogmen and swine nutritionists know that such fast growth is necessary for maximum feed efficiency and profits.

Maximum efficiency feeding program
Ful-O-Pep research has both the maximum efficiency feeds and feeding recommendations hogmen need these days for top profits. Here's the normal weaning plan:

6th day to 3 wks. use 3 lbs. Ful-O-Pep Gro Pig Pre-Starter per head.
3 wks. to 6 wks. use 12 to 15 lbs. of Gro Pig Starter Bracer per pig.
6 wks. to 10 wks. feed 50 to 60 lbs. Gro Pig Grower per head.
10 wks. to market use Gro Pork 280 and figure 270 to 290 lbs. feed per 100 lbs. of gain.

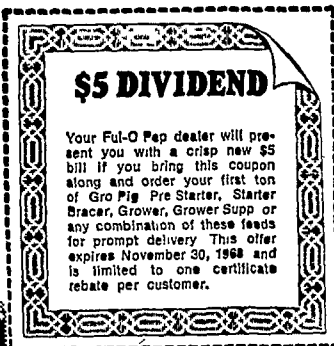

For early weaning, the Gro Pig Pre-Starter is fed longer, from 6th

day until pigs consume 10 lbs. each . . . then continue them on the feeding program above. Finishing on Gro Pork 280 has often produced gains of 2.1 lbs. per head per day when fed to thrifty pigs from 60 lbs. on to marketing.

The precision of Ful-O-Pep programming gives pigs the right balance of nutrients when they need it. Ful-O-Pep aims to meet the absolute needs of pork producers who figure exact costs and profits from every phase of their operation.

Ful-O-Pep feeder reports 2.35 conversion
One Iowa hogman tested the Ful-O-Pep program on a lot of 62 pigs. His detailed records show a feed conversion for the entire program from birth to market of only 2.35 lbs feed per pound of gain. You may do even better . . . and collect a \$5 dividend for trying these fine hog feeds.

From Where We Stand . . .

Debts — Settled Or Borne Science For Better Living

Farmers are going deeper and deeper into debt, a fact that will surprise hardly anybody. The Farm Credit Administration said this week the figure was \$48.7 billion at the beginning of 1968, nearly five times what it was in 1950 when it was \$10.7 billion. The non-real estate portion of the debt climbed 11 percent last year to \$23.5 billion. Most of the debt is to individuals and dealers, 41.5 percent. Commercial banks had 39.4 percent; Production Credit associations, 15 percent; and the FHA, 3.4 percent.

When we read the above report we couldn't help remembering the statement by Charles Walters Jr. and George J. Walters in their new paperback booklet entitled **A Farmer's Guide To Homestead Rights**. The authors say the question is no longer, "When will the Depression hit?" It is now a question of, "When will it hit you?"

Some of the findings in **A Farmer's Guide** are unique. The for instance are many. For instance, credit follows the laws of mathematics — it can be unlimited. Production follows the laws of physics, and therefore is limited. When credit outruns the physical possibilities of production, the result is either runaway inflation or a depression. Strangely enough, in a controlled or manipulated economy both can take place simultaneously. One sector of the economy can experience a depression and other sectors can experience inflation. At the present time the farmer is receiving depression prices on the market, but he buys at inflated prices. The device simply has to mean "bankruptcy."

That's rather strong language. But we do know, a debt either has to be settled or borne. When a person or a nation takes on too much debt, it becomes a burden that can't be paid or carried. It's something to consider the next time you are thinking of a loan to buy something that isn't going to substantially increase your cash income.

At least that's the way it looks from where we stand.

A Day Of Thanksgiving

Thanksgiving is the oldest observance, unique to the United States, which we now commemorate as a national holiday. It began with the pilgrims at Plymouth after their first harvest in 1621. From their tenuous foothold on the edge of an unknown continent, whose limits they were never to know, grew the English colonies, the conviction that government derived its powers from the people, the American Revolution and finally the United States of America.

What happened then through the years of our national history and what we have the opportunity of carrying forward today should be remembered with humility and thanksgiving on the 28th of November, 1968. We should be thankful. Our harvests were never more abundant, and our material wealth never greater. Our original dedication to the worth of the individual is intact, and our institutions in these fast-changing times are proving equal to the task of living up to this dedication. The faith of our forefathers was strong, and it built the land that we live in today. Let us give thanks that we have been able to fulfill that faith to this point in our history and continue in our common purpose to pass it onward with courage and with wisdom for generations yet to come.

The new edition of the U.S. Department of Agriculture's Yearbook of Agriculture, 1968, has just been published. It is appropriately entitled "Science For Better Living." It provides a fascinating panoramic view of the role which agricultural research is playing in greatly boosting the ability of modern agriculture to produce in ever-higher quality and quantity the basic essentials of human life — food, clothing and shelter. The dramatic results are illustrated by the fact that in 1950, one agricultural worker in the United States produced food and fiber sufficient to support 15 other people. Just 17 years later, in 1967, he produced enough for more than 40 people.

In an introductory chapter, Secretary of Agriculture Orville Freeman states that American agriculture is today the "... world's biggest 'storehouse' and research 'factory' for agricultural knowledge," and that our export of this knowledge can contribute in a major way to world stability and peace and "... to the eventual entry of the entire free world into the age of abundance." Chemicals play a major role in the high performance of today's agriculture, in regulating plant growth and in protecting animals, growing crops and stored food supplies from disease and insect pests. Ever safer, more sophisticated and selective pesticide chemicals are being developed and with them are coming advanced techniques of application. An example of the latter is aerial spraying of pesticides in amounts as low as one ounce per acre, resulting in better control of plant pests and diseases, lower food production costs and on the lighter side, more enjoyable picnics in the summertime with greater freedom from biting and stinging insects.

"Science For Better Living" makes fascinating reading. With world population standing now at nearly 3.5 billion and considering the prediction that it may double by the beginning of the next century, the book carries a message of vital import. The joining of scientific research to agricultural production in the United States points the way to man's survival on earth.

Farm Calendar

Saturday, November 23 (today)

9 00 a.m. — 4-H Hereford Club steers distributed, New Holland Sales Barn.
Manheim Young Farmer's Gun Shoot, Jay Foreman's Farm, North of Lexington.

Monday, November 25

7 30 p.m. — Red Rose FFA Chapter meet, Pequea Valley High School
8 00 p.m. — DHIA Board meet, Farm and Home Center.

Tuesday, November 26

1 30 p.m. — Lancaster County Extension Assn. Board meet, Farm and Home Center
7 00 p.m. — Ag-Industry Banquet, Farm and Home Center.
7 30 p.m. — Garden Spot Young Farmer meet, Vo-Ag Room, New Holland. (Fertilizer is subject)

Friday, November 29

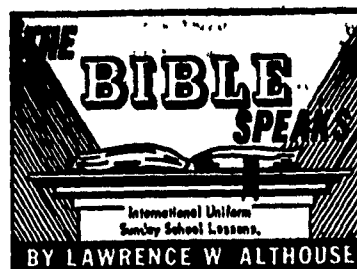

Lancaster County Ayrshire Assn. Banquet, Production Credit Bldg.

Local Weather Forecast

(From the U. S. Weather Bureau at the Harrisburg State Airport)

The forecast for the five-day period Saturday through next Wednesday calls for temperatures to average above normal with daytime highs in the 50's and overnight lows in the mid 30's to low 40's. The normal high-low is 48-31.

The temperatures are expected to change very little and little or no rain is expected.

THE SPOILED GAME

Lesson for November 24, 1968

Background Scriptures: 1 John 2:7-11, 3:11-18.
Devotional Readings: 1 John 4:15-21.

It is Ernest Hemingway in his novel, **A Farewell To Arms**, (Charles Scribner's Sons), who describes what many people call "love" as a kind of game.

I knew I did not love Catherine Barkley nor had any idea of loving her.

This was a game, like bridge, in which you said things instead of playing cards. How much of what is called "love" is in reality simply a game which people play by saying the right things and going through the right motions? To love someone may merely mean that we want them for some selfish purpose. Love affairs, whatever else they may be, are often lacking in love itself. People speak of loving chocolate sundaes, of being in love, of making love, and all the while they use the same word when they repeat: "For God so loved the world . . ."

Meaning of love
Someone has proposed that the word "love" ought to be removed from our vocabulary and that new words be given to convey the different meanings for which love is currently used. Unfortunately, this is not very likely to happen. Perhaps the next best thing is to try to do whatever we can to communicate more adequately what the Christian faith means when it speaks of "love."

Christians, like politicians, often speak in vague generalities. They talk of hope, faith, and love without making it specifically clear what they mean by these terms. Certainly, when the Christian says that "God so loved the world . . ." he does not mean what is meant when someone says that they would "love" to do "this" or "that." So what do we mean?

He has made it all too clear what love and hate are. He has spoiled our game, for he has taken away the luxury of our ignorance.

(Based on outlines copyrighted by the Division of Christian Education, National Council of the Churches of Christ in the U. S. A. Released by Community Press Service)

NOW IS THE TIME . . .

By Max Smith
Lancaster County Agent

To Recognize Farm-City Week

The week of November 22 to 28 is National Farm City Week, a time to create a better understanding between farm and city families throughout the country. Farmers and urban dwellers are mutually dependent upon each other in many ways and share more common problems every year. This is a good time to appreciate the activities and problems of others.

To Enroll In Short Courses

One of the important educational services offered at Penn State is the short courses in agriculture and home economics, also, the correspondence courses are very helpful in many of these fields of endeavor. An important short course in the near future is the one on Farm Income Tax and Social Security will be held at the University December 9 to 11. A very useful course for anyone working with tax returns. Applications may be made to Director of Short Courses, Room

The writer of 1 John is quite specific in communicating what "love" is to mean. When he writes that we are to "love one another" (3:11), he refuses to leave us with vague generalities.

Something you do

For example, "By this we know love, that he laid down his life for us." (1 John 3:16 RSV). The writer of this epistle might have tried to describe "love" with words alone. Instead, however, he points to something quite unambiguous: Jesus' offering of his life for us. The man without love takes life, but the follower of Jesus Christ, like the Master himself, is one who gives life for the sake of others.

For many people, love is merely something which is said: "I love you." Yet, necessary as is one's declaration of love, the loving act is far more persuasive. As Hemingway indicated, one may play the "love game" with words instead of cards. Often the words are lies, intended or unintended. Thus: "Little children, let us not love in word or speech but in deed and in truth." (1 John 3:18 RSV) Love is truly something you do, much more than something you say.

Furthermore, love is no less required of us than it was of Jesus: "... and we ought to lay down our lives for the brethren." (1 John 3:16b) Of course this "lay down our lives" is also likely to become a generality, so the writer goes a step further in making clear the meaning of love: "... if anyone has the world's goods and sees his brother in need, yet closes his heart against him, how does God's love abide in him?" (1 John 3:17 RSV) The act of "laying down our lives," does not necessarily mean dying for someone; it may mean living for someone, a task which sometimes may be even more difficult than dying.

The spoiler

The writer makes it very clear, too, what hate is. Hate is an emotion that blinds the hater: "... the darkness has blinded his eyes" (1 John 2:11). It robs him of the truth, of seeing things as they really are. Furthermore, "Anyone who hates his brother is a murderer," (1 John 3:15). But it is the hater who murders himself with the poison of his hate, smothering his own soul, and snuffing out his own eternal life.

He has made it all too clear what love and hate are. He has spoiled our game, for he has taken away the luxury of our ignorance.

(Based on outlines copyrighted by the Division of Christian Education, National Council of the Churches of Christ in the U. S. A. Released by Community Press Service)

208 Armsby Building, University Park, Pa. 16802
To Spray For Chickweed
The Thanksgiving to Christmas period is one of the best times to spray for the control of chickweed in alfalfa stands. The weeds are young and much easier to kill than next spring. The DiNitro sprays are to be used when air temperatures are above 50 degrees and Chloro IPC is the material when temperatures are below this mark. Simazine may be used on old stands without any grasses. Spray this fall for best results rather than next spring after much of the damage is done.

The following poem, written by Adam Lindsay Gordon was often quoted by John Galsworthy the English novelist when asked about his philosophy of life.
Life is mostly froth and bubble,
Two things stand like stone:
Kindness in another's trouble,
Courage in your own.

FARM WOMEN NEWS

SOCIETY 9

The regular meeting of Farm Women Number 9 — met recently at the home of Mrs. Mabel Heller with 23 members present. A report was given on the Cancer Pad Project, and the Lancaster county convention. A motion was made that we donate \$10.00 to the Kidney Fund for Mrs. Homer Million.

A Christmas party and dinner will be held at the West Willow Fire Co. Building December 13th, 1968 at 6:30 P.M. Please make reservations with Mrs. J. Edward Brenneman. Please bring \$1.00 gifts marked for

male or female — also a towel to be given to the Boys Club. Twenty-five fruit baskets were packed and delivered to shut-ins.

SOCIETY 21

Society of Farm Women 21 celebrated its 20th anniversary with a covered dish supper in the social rooms at St. Paul's United Church of Christ, Quarryville.

County officers Mrs. Scott Nissley, president; Mrs. Everett Kreider, secretary and Mrs. John Frantz, treasurer, were among the ten guests at the dinner.

In a short business meeting, the society decided to again sponsor a girl in the Miss Solanco contest to be held Nov. 30 at the Solanco Junior-Senior High School.

Program was in charge of Mrs. Doris Whithead, Paradise. She showed many ways to arrange dry flowers, permanent flowers and a variety of Christmas decorations. An invitation was extended to the women to attend the open house of Shriner's Flowers, Paradise, on Dec. 7 and 8.

Co-hostesses for the meeting included Mrs. Roland Heidebaugh, Mrs. Grayson Cooper, Mrs. Howard Steinberg, Mrs. Frank Aument and Mrs. Clair DeLong.

A "surprise" was promised for the December meeting.

SOCIETY 12

Society of Farm Women 12 held their annual family night banquet Saturday evening at the Willow Valley Restaurant. Mrs. Paul Harnish was in charge of devotions. Miss Ethel Kendig, president, was mistress of ceremonies.

Michael Hocking gave several selections at the organ. Guest for the evening, Mr. and Mrs. Jay Frey and family, sang as a family group.

Special guests were Mr. and Mrs. Scott Nissley. Mrs. Nissley is the county president. The next meeting Dec. 21 will be a Christmas party held at the home of Mrs. Earl Mowrer, Conestoga R2.

SOCIETY 3

Society 3 is busy planning for the Square Dance party to be held today at 7:30 p.m. at the Lincoln Fire Hall in West Ephrata.

At their recent meeting held in the social room of Melling's Lutheran Church, Schoeneck, Rollin Rheimheimer, an employee of the Menno Travel Service spoke of his experiences while he and his family were stationed in Kinshasa, Africa.

The next regular meeting will be held Dec. 21 in the Fire Hall, Mt. Airy. Hostess will be Mrs. Earl Miller.

This meeting will be the annual Christmas party for members and their children.

SOCIETY 13

At a recent meeting of Society 13 Mrs. John Bachman, director of the Blind Association, explained how that group operates, and displayed various articles made by blind people. The meeting was held in the home of Mrs. Jay E. Landis, 122 Hershey Ave.

The Society appropriated \$25 for use at the Embreeville State Hospital. A special committee will make a study to see how the money can be used most effectively.

The next meeting will be held in the home of Mrs. T. Hershey Rohrer, 1635 State St., E Petersburg on Dec. 14 instead of Dec. 21.

SOCIETY 27

The Show and Tell portion of the meeting of Society of Farm Women 27 extended throughout the evening as members exchanged holiday ideas and explained the "how to" of Christmas favors, decorations and ornaments.

Mrs. John Hershey, president, was in charge. Mrs. Arthur Wenger led devotions. The meeting with 21 present was held in the home of Mrs. Harold Mellinger, Mount Joy R1, with Mrs. Musser Ebersole as co-hostess.

The next meeting will be Dec. 10 in the home of Mrs. Sam Heneman, Marietta R1, at which time Christmas slides will be shown by the Kreider sisters of East Petersburg.

JOHN DEERE 1520 TRACTOR DEVELOPED

A new tractor which develops 46 PTO horsepower (maximum horsepower at PTO at 2500 rpm, factory observed) has been introduced by John Deere, according to local John Deere dealers. This tractor has been designated the 1520.

The 46-horsepower 1520 is right between the 38-horsepower 1020 and the 54-horsepower 2020, which are already in the John Deere line.

The 1520 is versatile enough to be the primary tractor on small- and medium-sized farms or a utility tractor on large farms.

The John Deere 1520 Tractor is actually a big tractor put into a 46-horsepower package. It is available with either a gasoline or Diesel variable-speed engine. It has a constant-mesh, collar-shift transmission with eight forward speeds and four reverse. An optional Hi-Lo shift increases pull-power 33 percent in any gear and at the same time reduces travel speed 26 percent. Another transmission option is the direction reverser which is also available on 1020 and 2020 Tractors. The direction reverser permits the operator to go from a forward to a reverse gear, or vice versa, without shifting. This feature saves considerable time, particularly on manure loading chores.

Think, work, and economize, and you'll soon be asked for advice on how to get ahead.

ON THIS

THANKSGIVING

1968

We feel humbly grateful
for the many blessings
constantly bestowed upon
us...for the freedom
under which we are
privileged to work and
worship...for the
many friends about
us...and for the privilege
of being allowed to render
a useful service
to our many clients.

County 4-H Members Compete In State Horse & Pony Show

Months of intensive practice and a lot of self-determination paid off for several county 4-H Club members last week when they won awards at the State 4-H Horse and Pony Show in Harrisburg (November 15-16).

The winners and their placings are as follows: Nancy Lyn Henkel, R. D. 1, Strasburg, first place in Hunter Seat Equitation, Junior Division; Thomas J. Hamill, R. D. 1, Mount Joy, second place in Saddle Seat Equitation and Cathy Reinhold, R. D. 2, Columbia, third place Western Pleasure Class.

Several other county horse club members also competed in the state contest and received participation ribbons. They were: Nancy Weber, Letort Road, Millersville; Kirk Bussell, R. D. 1, Manheim; Steve Mitchell, Refton; Randy Glick, Bareville; Shirley Craig, R. D. 2, Nottingham and Robert Hershey, Manheim.

Riders and their horses, winners of county and district eliminations, were entered in 25 different classes with members from each district in the Commonwealth competing. Approximately 375 contestants from most counties were entered in classes.

Associate County Agent Jay Irwin said classes in the state contest gave club members an opportunity to exhibit their skills in horsemanship and their ability to groom a horse for showing.

He reports the primary purposes of the State 4-H Horse and Pony program are to develop riding skills; gain self-confidence by competing in shows;

practically every type of riding which is popular today.

The junior event was part of the Pennsylvania Livestock Exposition which was held last week in the State Farm Show Building. The state show climaxes the year for more than 5,000 Commonwealth 4-H members enrolled in horse project work.

NANCY LYN HENKEL, of RD1, Strasburg, riding QUEEN OF HEARTS, a 5-year-old mare, won championship honors in the Hunter Seat Equitation (not to jump) junior division class in the State 4-H Horse Show Friday in Harrisburg. Nancy, the daughter of Mr. and Mrs. John Henkel, is a member of the Rough Riders 4-H Club.

FERTILIZER MEETING

Committeemen Selected By Agway Unit

Four committeemen of the Garden Spot Unit of Agway Inc. were re-elected Monday night at the annual meeting held at the Farm and Home Center. They are: John E. Campbell, New Holland; J. Everett Kreider, Quarryville R1; Henry E. Shenk, Manheim R2; and Raymond H. Weaver, New Holland R1.

The farmer committeemen are the local governing body of

the 102,000 member, 12 state cooperative that reported total volume of \$392 million during the past year. They must be farmers, common stock holders in Agway Inc. and a user of their services and products.

Featured speaker for the farm meeting was Ronald Goddard, Vice President and Assistant General Manager of Agway Inc. He listed six key items to be considered in the cooperative's future: 1, better milk to farm delivery of feeds; 2, profile, explained to mean where farms are hooked up to computers; 3, research, 1½ million

dollars were spent last year; 4, Insurance; 5, marketing, "one of the greatest needs in agriculture"; and 6, investments.

The general manager reported on the cooperation with Dairy Development Inc. where 12 leading cooperatives representing 50,000 dairymen are working on how to do more with milk. This research will help real milk compete with the substitutes.

Willis Esbenshade, District 18 Director, said he had predicted it would take three years to complete the merger of GLF, Eastern States and Farm

Pa. Poultrymen Plan Farm Show Meeting

Dr. Roland Leach, Penna. State University Poultry Nutritionist, will address Penna. poultrymen on "Advances in Poultry Nutrition" at the 53rd Annual Pennsylvania Farm Show. The meeting is scheduled for Wednesday, January 15, at 100 p.m. in Room 305, Dept. of Agriculture Building, directly across the street from the large arena of the Farm Show Building.

At 2:00 p.m., Pennsylvania pullet producers will discuss the topic: "I Grow Pullets This Way Because...". Dr. Floyd Hicks, Pennsylvania State University Extension Specialist, will be moderator of the panel consisting of Warren Burr, Tunkhannock; Russell Latshaw, Barto;

Bureau. "Now three years are up and we are well pleased the way things are going. It was a big job, he said. But most of the surplus properties have been sold as we have gone from large mills to smaller local ones."

The local unit manager, Kenneth Emerson, reported a 4½ million dollar gross business in the Lancaster, New Holland and Quarryville stores plus the six Agway Representatives in the County.

The Petroleum business locally was reported the largest in the Agway Cooperative.

Refreshments were served following the meeting and Door Prizes were awarded. Henry Shenk, chairman, was in charge of the meeting.

Vernon Norris, Valencia; and James Schublin, New Tripoli.

The Annual Farm Show Banquet which traditionally is held on Wednesday of Farm Show week will be a "fund raising dinner". Messrs. Hendrik Wentink, Donald Horn, and George Hauer are co-chairmen. Dr. Tom Haggai of High Point, North Carolina will be the featured speaker. The banquet has always been a "sell-out" in recent years. Tickets are available from the Pennsylvania Poultry Federation office, 2430 North Second St., Harrisburg, Penna. 17110.

Hunters Urged To Enter Big Game Exhibit

Hunters throughout Pennsylvania were reminded today of the North American Big Game Exhibit which will be held at the Farm Show Building, Harrisburg, Pa., February 10th through the 15th, as part of the big Eastern Sports and Outdoor Show.

John Altland, show manager, urged all hunters who have made trophy kills to enter the enter a trophy in the exhibit, competition. There is no entry fee and anyone is eligible to which is the largest of its kind in the country. Winning entries will receive engraved plaques.

Whitetail Deer, Mule Deer, Columbian Blacktail Deer, Wapiti (Elk), Caribou, Moose, Sheep, Goat, Pronghorn (Antelope), Bear, Cougar and Jaguar are the big game which may be used for exhibit.

The Big Game Trophy Display will be in charge of Baird Hershey, York Springs, Pa. The official scoring system designed by the Boone and Crockett Club will be used.

Complete information and entry forms are available by writing to the Eastern Sports and Outdoor Show, 1718 North Second Street, Harrisburg, Pa. 17102.

Farm Vacation Directory For 1969 Being Compiled

The State Department of Agriculture is now compiling the 1969 issue of the "Pennsylvania Farm Vacation Directory." Farmers who have facilities for paying guests can turn them into a profitable enterprise by taking advantage of the promotional services of the Department.

All previous registrants who have offered accommodations are being contacted for renewals of their listings, but with farm vacationing becoming a growing part of Pennsylvania's tourist industry, the Department is seeking additional registrations.

Farmers may obtain the necessary forms for listing in the 1969 directory by writing to the Bureau of Markets, Pennsylvania Department of Agriculture, 2301 N. Cameron St., Harrisburg 17120. Closing date for entries is January 2, with distribution of the directory set for March of next year.

TURKEY PRESENTED TO LBJ

President Lyndon B. Johnson and Senator Everett McKinley Dirksen were on hand at the White House for the 23rd Annual Turkey Presentation. The center of attention was a 40-pound broad-breasted white tom which was presented to President Johnson by Marvin Johnson, President of the National Turkey Federation.

President Johnson stood smiling as Marvin Johnson made the presentation on behalf of the National Turkey Federation, the Poultry and Egg Na-

tional Board, and the nation's entire turkey industry. The President responded by saying, "We'll enjoy eating it, and hope everyone in this country can have one on their table at Thanksgiving."

John W. Scott (Continued from Page 1)

vention in Peoria, Ill., served as 14th master of the Pennsylvania State Grange from 1962 to October 24, 1968.

He has been secretary of the National Grange since 1965 and prior to that was national gatekeeper. Active in the Grange for 34 years, he is a member and past master of Union and Pomona Granges in Butler county.

Three times he was elected to two-year terms as state master, the maximum under Grange rules. As head of the State Grange he gave leadership to a 60,000-member organization of 638 subordinate bodies in 65 counties and 58 Pomona Granges.

As national master of the Grange, he succeeds Herschel D. Newsom who leaves the post after 18 years to take a place on the U.S. Tariff Commission to which he was named by President Johnson.

A former Butler county dairy farmer, Scott's interests have been closely linked with education and agriculture, and as head of the State Grange he gave conscientious statewide leadership in these fields.

He has served on important state commissions by appointments of Governor Shafer and Governor Scranton. He is a member of the Governor's Committee on Preservation of Agricultural Land, the Governor's Committee to determine priorities in state needs, and the State Advisory Committee on Agricultural Research.

He is a member of the advisory council of the State Board of Education, the State Advisory Committee for Vocational

and Technical Schools, and the education and finance committee of the State Chamber of Commerce. He is a past president of the Butler County and Slippery Rock area School boards. He is a director of the Farmers and Traders Life Insurance and National Grange Mutual Insurance Companies, both Grange affiliates.

Twice he has been honored for distinguished service. The New Holland Machine Company conferred on him its Award of Merit in 1966 for outstanding leadership in agriculture. In 1960 the Butler County Pomona Grange cited him as "Man of the Year" for civic leadership and community service.

He is the son of Frank W.

Scott, Butler, R.D. 5, and the late Mrs. Scott. He is married to the former Dorothy McCandless, daughter of Mrs. B. H. McCandless, Butler, R.D. 1, and the late Mr. McCandless. They have three sons, James, an instructor at Princeton University; Thomas, student at Dickinson College, and David, at home. They are members of West Shore Baptist Church, Camp Hill, of which Mr. Scott is a former trustee.

County 4-H

(Continued from Page 1)

eight team competition. The contest was held in conjunction with the Eastern National Livestock Show at Timonium.

Richard Buckwalter, son of Mr. and Mrs. Richard E. Buckwalter, Lititz R3, was the top individual scorer in the contest featuring 11 classes of livestock and three sets of oral reasons. He had 644 points out of a possible 700.

Other team members were Larry Herr, son of Mr. and Mrs. Carl B. Herr, 840 Penn Grant Road, Lancaster; Larry High, son of Mr. and Mrs. Harvey High, Bareville; and Michael Smucker, son of Mr. and Mrs. Edward F. Smucker, Ephrata R2. Smucker was 3rd individual with 635 points and Herr was 5th with 621 points.

This same team placed 2nd at the recent Pennsylvania Livestock Exposition in Harrisburg and will be going to Chicago next week to meet national competition.

Virginia was second at the Maryland Exposition followed by West Virginia, North Carolina and Maryland. More than 1,500 entries from 17 states competed in the Eastern National for a total of \$52,000 in prize money.

Mystery Farm Contest

(Continued from Page 1)

is identified at the end of these contest rules. This week we move much closer to Lancaster to a farm setting that must be called Central Lancaster County. Study the enlarged photograph, guess which of your neighbor's farm is pictured and send us your entry. Again, best wishes to all of you.

Mystery Farm Contest Rules

1. The contest consists of eight weekly installments featuring the picture of a Lancaster County Farm, each from a different area of the County. Cash prizes will be awarded from a drawing of the correct entries following the contest. The awards will be: First Prize, \$100; Second Prize, \$50 and Third Prize, \$25.

2. All paid subscribers to Lancaster Farming are eligible. Subscribers may enter each week (8 times) but only one entry per week will be allowed.

3. To enter, study the enlarged photograph within the Mystery Farm Picture Frame in each issue. Guess which of your neighbor's farm is pictured. Put your identification (THE NAME ON THE MAIL BOX AND HIS ADDRESS) along with your own name and address on a five-cent post card or in a letter. (Note: the correct identification will be the person actually living on the farm.) Mail it to us so we have it in our office by Friday morning following the Saturday publishing date.

4. Entries must be mailed to our office address as follows: The Mystery Farm Contest, Lancaster Farming Newspaper, P.O. Box 266, Lititz, Pa. 17543. No phone calls will be accepted as entries.

5. Entries become the property of Lancaster Farming and the decision of the judges is final. Identification of the Mystery Farm will be published in each following issue.

THE FARM SETTING above was featured last week as the first in a series of eight Mystery Farms. It is the farm home of Mr. and Mrs. Marvin S. Nolt, Peach Bottom R2, and their nine children who range in age from one to eleven. The road going between the barn and house is Ulrich Road located just off Route 272 East of Wakefield. Hope you had it right. The second Mystery Farm is pictured on Page 1 of this issue as the contest continues. Rules to enter are found with the photograph.

PUBLIC SALE

Of Valuable Real Estate,
Personal Property, Antiques
And Farm Implements

ON SAT. NOV. 30, 1968
AT 9:30 A.M. SHARP

At R. D. #1, Red Lion, Pa. in York County on the road from Craley to New Bridgeville in Chanceford Twp. next to Shenbergers Chapel Church. The undersigned executors of the W. Francis and Carrie M. Craley Estate will offer at Public Sale the following.

REAL ESTATE

Large farm consisting of approximately 150 acres. There are approximately 100 acres of good level rich farming land and the balance in pasture and good woodland, lots of very good road frontage on both sides of the state and township roads. Improvements consist of a large 7-room frame house with bath, oil baseboard heat, cemented basement, 6-room frame house with bath, one 5-room and one 6-room house each with running water. Also a large barn, 2 large tobacco sheds — one with large cellar, corn barn, garage, milk house and other out buildings, good well of water. Anyone on the market for a good large farm, be sure and inspect this one. Inspection date: Saturday, Nov. 23, 9 A.M. to 4 P.M., and on day of sale. Farm will be offered at 2 P.M. on day of sale. Terms on day of sale.

PERSONAL PROPERTY & ANTIQUES

Also farm implements mostly horse drawn, lots of harness collars, etc. For a more complete listing drop a card to Gilberts Auction Service, R. D. #1, Wrightsville, Pa. Farm implements will be sold first. There is lots to be sold — Come early. Not responsible for accidents on day of sale. Terms: Cash.

Refreshments available on the premises.

WHY? YOU ASK?

WHY SHOULD YOU LIST YOUR COUNTRY PLACE, FARM, LAND OR LOTS WITH WENTZEL? Because Wentzels have many waiting city buyers who many times pay higher prices than your local buyers; because everybody knows Wentzel advertises regularly; Wentzels help arrange financing; Wentzel has a whole barn-full of ex-farmer boys (now skilled negotiators) to help sell your present place more quickly and efficiently and to help you buy or build your next home. Phone 394-3763 today.

INTER-STATE MILK

(Continued from Page 1)

delegates. "Cooperatives get things done, and they use the democratic structure which creates the basic strength of any cooperative." Seipt told the attending delegates that "promotion and advertising programs are imperative to become a part of the day-to-day business operation and must be carried out as our industry is in the mainstream of American business."

Dr. James E. Honan, general manager, questioned the delegates in his report, "Have you earned one more tomorrow by the work you did today?" He asserted how Inter-State had attained the right for tomorrow by the accomplishments of the Cooperative. Honan charged the delegation with the responsibility of each member's participation in his Cooperative's program. This individual responsibility, Honan continued, is necessary for dairy farmers to receive their "fair share" of the consumer's dollar.

Patrick J. Healy, assistant secretary, of the National Milk Producers Federation, spoke to

one of the delegates' sessions and pointed to the continued need of a united voice of dairy farmers in our nation's capital. Healy told the group of the results of this united voice.

Thomas P. Ensor, Street, Md., Inter-State's Young Cooperator for 1968, expressed to those attending the Cooperative's annual meeting of the need to recognize the problems of young dairy farmers. Ensor emphasized that Inter-State is a "pacesetter" for other cooperatives to follow with its program for young dairy farmers.

Representing dairy farmers from the area were:

Directors — Robert B. McSparran, Peach Bottom; Melvin M. Brendle, East Earl; and Daniel L. Martin, Manheim, Pa.

Members — Aaron S. Glick, Quarryville; P. Robert Wenger, Quarryville; Lester M. Weaver, Quarryville; Lewis M. Aument, Quarryville; Robert H. Kreider, Quarryville; John T. Byers, Quarryville.

(Continued on Page 9)

INTER-STATE ANNUAL MEETING. (left to right) Daniel Martin, Manheim, is congratulated on being newly elected to the executive committee by Wilbur Seipt, President of Inter-State Milk Producers' Cooperative.

Looking on is Robert McSparran, Peach Bottom, District 3 director; Melvin Brendle, District 6 director and Charles Wagner, delegate.

ARE YOU FEEDING YOUR BEEF CATTLE FOR 17.72 CENTS PER LB. OF GAIN?

Christ Landis of Ronks did on the Wayne Cattle Feeding Program using Wayne 32% Beef Balancer

Report on a Wayne Feeding Demonstration at the Christ Landis Farm. Ronks to demonstrate the results of a maximum grain-minimum roughage finishing program. Thirty Hereford steers went on feed July 19 1968 were fed in a typical steer barn and had access to a small exercise yard

PROGRAM: Hay was fed for 14 days starting with 5 lbs per head per day and tapering off to no hay at 14 days. A 11.5% protein mixture of ear corn and Wayne 32% Beef Balancer was fed from start to finish. Proper levels of Aureomycin and Stilbestrol were used. Each steer received 3cc of Wayne Injectable A-D-E upon arrival and Wayne Lectro-Sul was used in the drinking water for 5 days. The cattle were wormed with Wayne Cattle Wormer at 7 days. Feed was weighed daily.

Cattle were not individually weighed on arrival. Incoming pen weight was 24,350 lbs or 811 lb average. Cattle were weighed individually on 8/19, 9/24 and 10/25.

Christ Landis (right) and son Jim check Hereford steers in barn yard.

TOTAL FEEDING PERIOD (98 days)

SECOND SECTION

Guernsey Assn. Elects New Directors; Presents Awards

The Annual Meeting and Banquet of the Lancaster County Guernsey Breeder's Association was held last Friday evening at the Rhoads Spanish Restaurant in Quarryville. Three new directors were elected and awards were given to Guernsey breeders with high production averages.

Elected for three-year terms in the local association were: Melvin Breneman, Strasburg R1; Melvin Stoltzfus, Ronks R1 and Jessie Balmer Sr., Lititz R4. Balmer is also the new State Director from the local area.

In the awards program, John N. Landis, 1804 Hempstead Road, had the highest herd average in the Guernsey Association with 51 Registered Guernseys averaging 12,055 pounds of milk and 604 pounds of butterfat. The Landis herd also has the top age cow record for the year on Hill Girt Royal Leaders Glana who finished with 16,006 pounds of milk and 870 pounds of butterfat.

Second high herd average was

on Raymond and Louise Witmer's 46 Registered Guernseys, with 11,183 pounds of milk and 581 pounds of butterfat.

The highest lifetime producer for both milk and butterfat is Jessie Balmer's Stevens Baron Vanilla. This cow is nearly 17-years-old and has lifetime credits to date of 159,080 pounds of milk and 6,652 pounds of butterfat.

Other herds over 500 pounds of butterfat are as follows: John A. and Arthur Breneman, 41 cows, 11,419m and 557f; K. D. and Elsie Linde, 46 cows, 11,268m and 533f; Fred Crider, 11,433m and 532f; Clarence Hainish, 48 cows, 10,737m 529f; Elmer Mast, 10,111m and 515f.

The Witmers also had the top two-year-old for both milk and butterfat with Penn-Del Brilliant Vlda's record of 13,906 pounds of milk and 673 pounds of butterfat.

J. Rohrer Witmer had the top milk record on a three-year-old with Wtlas Greta who produced

GUERNSEY BREEDERS at the Annual Meeting held last Friday night at the Rhoads Spanish Restaurant. They are: (left to right) Melvin Stoltzfus, Newly Elected Director; Kenneth Garber pre-

sending high herd award to John N. Landis and Jessie Balmer, Newly Elected Director. Not present was Melvin Breneman, Strasburg R1 also elected. L. F. Photo

13,685 pounds of milk and 646 A. Breneman herd. Doris produced 12,725 pounds of milk and 671 pounds of butterfat.

The top butterfat record for three-year-olds was on Home- stead Acres Doris in the Robert an aged cow was made by

Cherrycrest Supreme Patsy with 16,076 pounds of milk and 727 pounds of butterfat. Patsy is in the herd of Melvin R. Stoltzfus.

Kenneth Garber, DHIA representative, made the production awards and Harry Mumma presided at the meeting.

Guest speaker was Rev. George Paterson, D. D., Strasburg Presbyterian Church, who conducted a slide and recorded presentation of several foreign countries.

Judging by the magazine advertisements 'the better stores' carry everything.

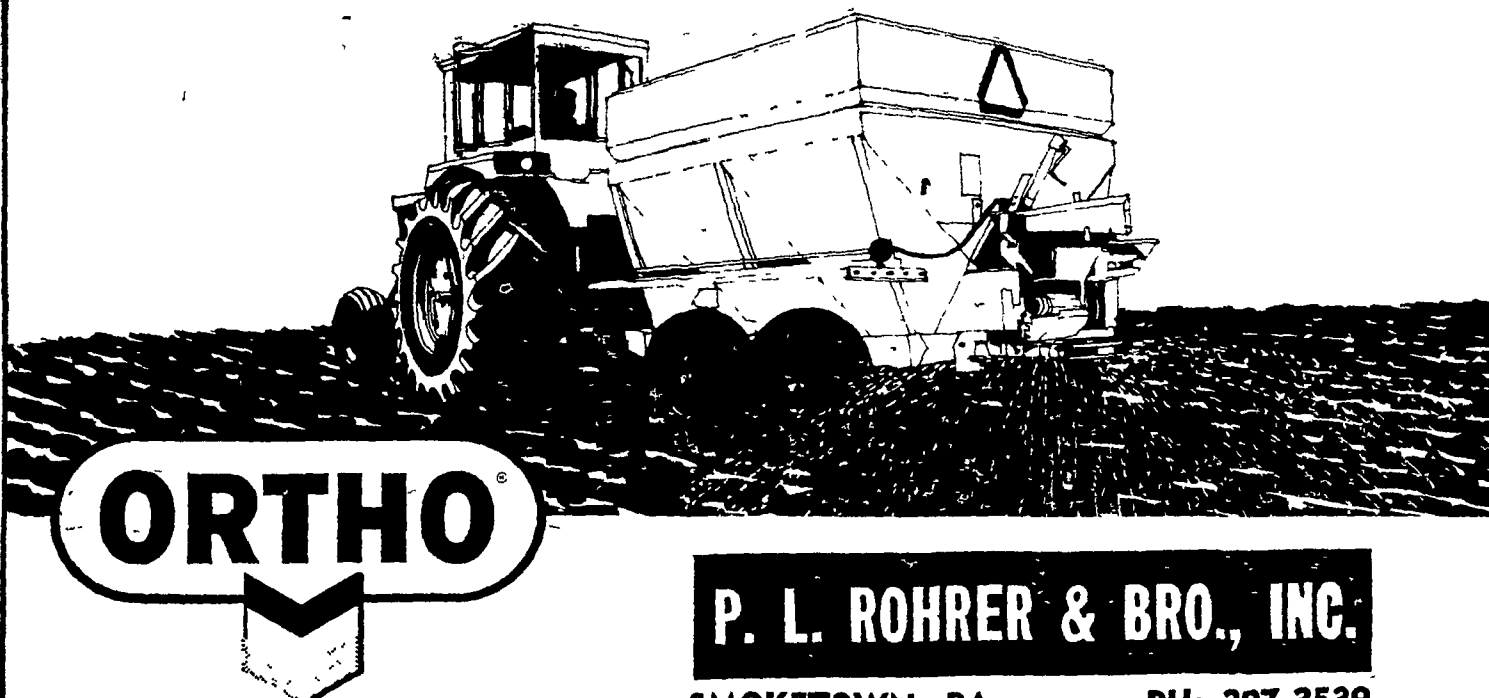

Unhappily, when you apply conventional fertilizers, much of the phosphate is locked up through fixation in the soil.

□ Up to now, this has been fought by carefully placing the phosphate closer to the surface and near each plant. Trouble is, this leaves your phosphorus supply "high and dry" during the heat of the summer. □ Or- tho solved this problem during the development of UNIPELS. A unique "phospho-nitric"

process makes the phosphate in UNIPELS 100% available, yet makes it resist fixation regardless of how it's applied!

How much of the phosphate you apply is actually used by your crops?

□ And when you plow down UNIPELS in the fall, the phosphorus and other vital nutrients are down in the moisture zone where roots are most active in the hot, dry summer. □ Come see us soon about the year 'round benefits of fall fertilization with Ortho UNIPELS — the All-Season Fertilizer.

FOR THE FARM WIFE AND FAMILY

CRANBERRY SPARKLE

by Mrs. Richard C. Spence

Bright red, tart-flavored cranberries contribute mostly color, flavor and variety to everyday meals. They also furnish small amounts of valuable nutrients needed by the body such as Vitamin A, for clear healthy skin and normal eye vision at night; Vitamin C for healthy gums and building up resistance to disease; and small amounts of calcium, iron and phosphorus.

These tart berries are rich in pectin, a jellying substance, making them popular for jams and jellies.

Scientists find that unstrained sauce has 75 to 80 per cent of the original Vitamin C of the fruit, but strained sauce loses practically all of this vitamin — as does bottled cranberry juice. However, some cranberry cocktail on the market today has been fortified with extra amounts of Vitamin C.

Good quality cranberries should have a fresh, plump appearance, combined with a high luster and firmness. The red color may vary from a bright

red to dark red according to the variety. The dark red berries are somewhat smaller and have a sweeter flavor.

Freezing cranberries is easy. If you buy the berries in bulk, do not wash but pack directly into freezer-type box or bag. Fill the container to the top but do not crowd, seal and place in freezer. Some berries come in cellophane bags. If the bags have small holes in them, you better place in another freezer-type bag and seal tight before placing in freezer.

Cranberries can be kept in

the refrigerator for a long time if kept at a uniform temperature, but freezing will keep quality better. Avoid putting cold berries in a warm room since the warm air causes them to sweat and encourages decay. Wash cranberries just before using them.

This tart fruit is a popular meat accompaniment and brightens up many other foods. Try cranberry sauce on waffles, pancakes or steamed pudding. Or add chopped cranberries to your favorite muffin recipe or breakfast bread for a welcome change.

The tangy flavor of cranberry juice is nice served as an appetizer and combined with other juices such as pineapple, grape, orange or grapefruit, adds a rosy hue as well as a piquant flavor. Add a scoop of sherbet to give cranberry juice a party touch for luncheons or dinners.

CRANBERRY TEA BISCUITS

- 2 cups sifted all-purpose flour
- 3 teaspoons baking powder
- 1/4 teaspoon baking soda
- 1 teaspoon salt
- 3 tablespoons shortening
- 1 egg
- 1 cup jellied cranberry sauce, crushed
- 1/4 cup sour cream
- Grated cheese

Sift dry ingredients together, and cut in shortening. Beat egg until creamy, add cranberry

sauce and sour cream, and add to first mixture. Roll out on floured board and cut into square biscuits. Place on baking sheet and sprinkle with grated cheese. Bake 15 to 20 minutes at 400 degrees.

STRIPED CRANBERRY BREAD RING

- 1 can (8 ounces) whole berry cranberry sauce
- 1/2 cup firmly packed brown sugar
- 1/2 cup finely chopped nuts
- 3/4 cup quick-cooking oatmeal (uncooked)
- 1/4 to 1/2 teaspoon cinnamon
- 2 packages refrigerated bake-and-serve biscuits (20 biscuits)
- 1 cup confectioners sugar
- 1/2 teaspoon lemon rind
- 1 to 2 tablespoons cranberry juice cocktail

Combine cranberry sauce, brown sugar, nuts and oatmeal; mix well. Separate biscuits and place about 1 tablespoon cranberry mixture on each biscuit. Place biscuits in a well-buttered 9-inch ring pan so that cranberry mixture is between each biscuit (biscuits will be standing on end in pan). Bake in hot

oven (400 degrees) for 20 to 25 minutes. Cool 5 minutes, then loosen edges and turn out on rack to cool slightly.

Blend confectioners sugar and lemon rind with enough cranberry juice to give a good spreading consistency. Spread over coffee ring while ring is still hot. Serve warm.

CRANBERRY COCONUT HAYSTACKS

- 2 cans (1 pound each) jellied cranberry sauce
- 1 package (12 ounces) frozen pound cake, defrosted
- 8 well-drained canned apricot halves
- 2 cups heavy cream, whipped
- 1/2 cup confectioners sugar
- 1 teaspoon vanilla extract
- 1 cup shredded coconut, toasted

Cut each roll of cranberry sauce into 8 slices. Cut pound cake into 24 slices, then cut slices into rounds the same diameter as the cranberry sauce. Make stacks using 3 slices of pound cake and 2 slices cranberry sauce. Top with apricot half, round side up. Whip cream with confectioners sugar and

READ LABEL BEFORE SPRAYING PESTICIDES

Livestock treated with certain pesticides for control of insects and other pests such as lice, cattle grub and ticks, must be held a certain number of days before being slaughtered, says David O. Quinn, extension specialist at West Virginia University.

The label on the pesticide will contain the information necessary for determining the waiting period from application to slaughter. Directions must be followed exactly to avoid illegal residue that contaminates meat.

Proper use of pesticides will protect livestock, eliminate harmful residue and increase your production of high-quality animals that sell at a good price, Quinn says.

Draw your wisdom from old men, and your enthusiasm from young men.

HOME DECORATING AID

Making your home more comfortable is part of your job as homemaker. Individuality develops in decorating when your home is the natural outgrowth of your family's interests.

There are no set rules for home decorating. But, you will need guidelines if you want the satisfaction of creating the changes yourself. You'll find practical guides in a home study course on home furnishing. Available from The Pennsylvania State University, the course is designed to aid the person untrained in decorating.

Course material covers color and the art of combining colors into pleasing color schemes. One section discusses the arrangement of furniture and accessories into attractive and functional groups. Another part of the course has information on buying furnishings such as floor coverings, lamps, curtains, and draperies.

You can get the House Furnishings course for \$2.25 from Correspondence Courses, 202 Agricultural Education Building, University Park, Pennsylvania 16802.

For The Farm Wife

(Continued from Page 14)

vanilla. Frost sides and tops of stacks, heaping the cream on the top to make a cone-shaped mound. Toast coconut in a skillet. Cool and sprinkle coconut over whipped cream. Chill until ready to serve. Serve with hot spiced cranberry-apple drink.

CRANBERRY APRICOT HAM GLAZE

- 1 can (1 pound) jellied cranberry sauce
 - 1/2 cup brown sugar
 - 1/2 cup drained canned apricots, sieved or 1 can strained apricot baby food
- Beat cranberry sauce with beater until "saucy" smooth. Add brown sugar and sieved apricots. Spoon over ham the last half hour of baking or heat and pour over ham slice just before serving.

CRANBERRY PUDDIN' CAKE

- Topping:**
- 1 1/2 cups fresh cranberries
 - 1 1/2 cups water
 - 1 1/2 cups sugar
 - 2 teaspoons cornstarch
 - 1 tablespoon butter
- Sprinkle of nutmeg
- Cook cranberries in water till they "pop." Mix sugar and cornstarch and add slowly. Cook five minutes. Remove from fire, add butter and nutmeg. Turn into 8 x 8-inch baking pan.
- Cake:**
- 1 1/4 cups sifted flour
 - 2 teaspoons baking powder
 - 1/2 cup sugar
 - 1/4 cup shortening
 - 1/2 cup milk
 - 1/2 cup cut up dates
 - 1/2 cup chopped walnuts
 - 1/2 cup raisins

Sift flour, baking powder and sugar together. Cut in shortening until consistency of corn meal. Pour in milk and mix well. Blend in dates, walnuts

Lancaster Farming, Saturday, November 23, 1968-15

Ladies, Have You Heard? . . .

By Doris Thomas, Extension Home Economist

Consider Launderability Of Clothes

When buying new clothes, check their launderability and choose garments that require minimum care.

Certain construction features, minimum-care fabrics, and special finishes make washing and ironing easier, and save time and energy.

Read hangtags and garment labels to learn the fabric content and amount of shrinkage to expect, as well as some washing instructions. Save the tags.

Check these tags when you launder these garments to give them the best of care.

If washing results differ from those expected from the information given on the tag, return the merchandise to the store. You'll be helping promote reliability in labels and instructions.

Deep, well-finished seams with edges that don't fray easily indicate easy care. And the fewer the seams, the better.

Be sure all parts of the garment are colorfast to machine washing.

Look for well-finished buttonholes, hems, trim, and washable linings.

Closely woven twill or plain weaves are less susceptible to snags and distortions in laundering than loose knits and drapery weaves.

Tips On Using Baking Powder
Although baking powder is a very small part of a recipe it's

the key to many successfully baked foods.

Baking powder largely determines the grain, texture, shape, volume, and lightness of baked foods.

For good results, the amount of baking powder needed is small and exact.

Not quite enough or a bit too much can cause baking failures.

Not all baking powders are alike — the three types of baking powder all contain soda and one or more acid-reacting substances. But acid ingredients differ.

PIONEER OF BETTER IDEAS IN SILO UNLOADING

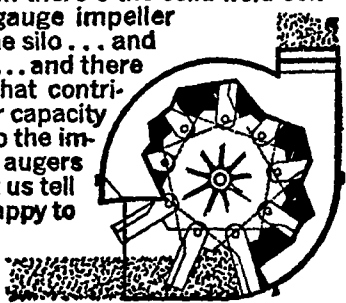

A 2-foot diameter impeller isn't the only reason you'll feed cattle faster with a Van Dale silo unloader

HERE'S ANOTHER...

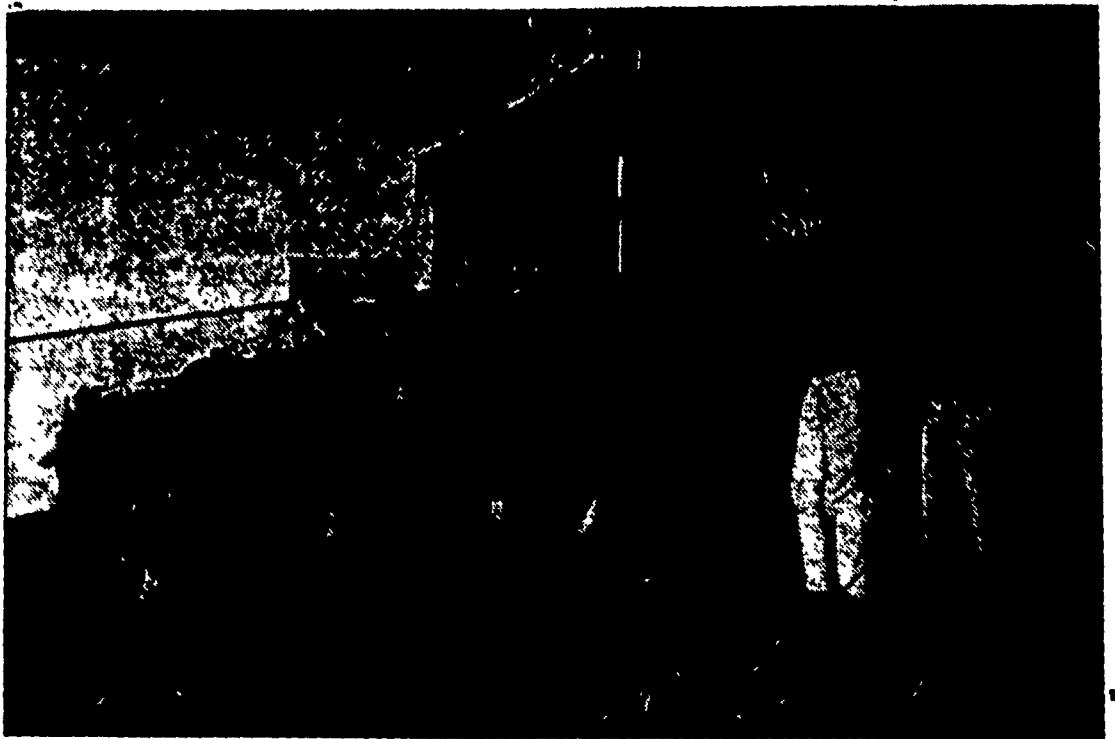

... pioneered by Van Dale back in 1957... the heftier cast iron swinging V-paddles. They give the impeller more unloading capacity. Each 6 lb. V-paddle is weighed, matched, and balanced, then pre-run for more dependable performance. And then there's the solid-weld construction of the heavier gauge impeller housing for longer life in the silo... and the biggest impeller throat... and there are many more reasons that contribute to Van Dale's superior capacity and reliability in addition to the impeller... like the double augers and the... But why not let us tell you about them. We'll be happy to drop by to see you at your convenience.

A Wayne Feeding Demonstration was held recently at the farm of Christ Landis, Ronks R1, to demonstrate the results of a maximum grain-minimum roughage finishing program. Thirty Hereford steers

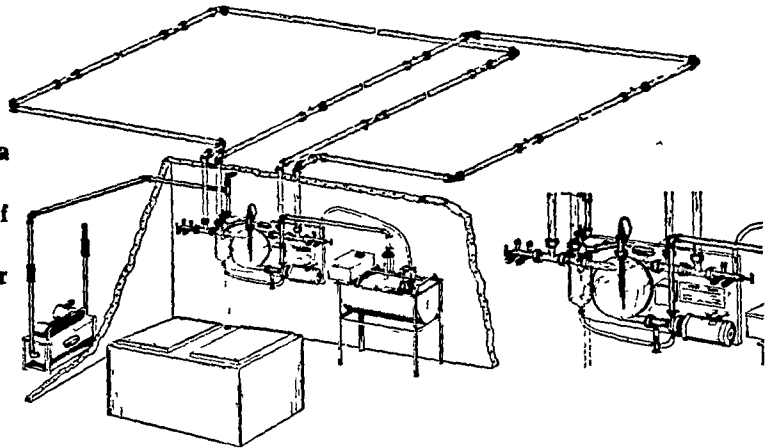

were placed on feed July 19, 1968. In the L. F. Photo, Landis (right) and his son Jim check the fattened cattle in their barn yard.

Perfection Can Put A Pipeline In Any Barn

WHY BUY A PIPELINE?

For An Average
40 Cow Herd
You Can . . .

1. Save walking 100 miles a year.
2. Save carrying 292 tons of milk a year.
3. Save 200 hours per year on an average herd.
4. Produce higher quality milk.
5. Increase your milk production.

WHY BUY A PERFECTION PIPELINE?

1. Engineered for the modern dairy farm of today as well as the dairy farm of tomorrow. Around the barn pipelines and milking parlors.
2. The only milkhous control unit that is assembled at our modern new factory on a stainless steel panel. Pretested for trouble free operation, self-draining with patented washing features.
3. Built and guaranteed by Perfection Milker-Division of Sta-Rite Industries, Inc., of Delavan, Wisconsin, a recognized leader in home water systems and agricultural components.

10 Steps Recommended For Improvement Of Dairy Herd Production

Dairymen who are seriously interested in getting the maximum rate of improvement in production from their herds with a minimum investment of time and money should carefully consider these steps, says

**SWEIGART
FIRESTONE**

329 W. High St., Manheim, Pa.
Phone 665-2258

William Leamy, extension dairyman at the University of Vermont:

Keep individual production records such as DHIR; DHIA; or owner sampler.

Choose your herd sires from among plus-predicted-difference bulls with high repeatability values.

Breed 15% to 25% of your herd to young bulls under progeny test.

Rank your cows for production using the herdmate comparison list.

Remove the bottom 10% to 15% of the herd each year. Cull on production. Any cow that averages 1,500 to 2,000 pounds

of milk below herdmates is a candidate for culling.

Raise all the healthy heifer calves for replacement that labor and facilities will permit.

Remove your poorest producer when you have a better heifer to take her place.

If you must choose between a fair older cow and an average heifer — save the younger animal.

Do a good job of herd management to prevent undue losses of good cows.

Give every cow an equal chance; challenge her genetic ability by giving her all she'll eat and measure her response.

Snowmobiles Illegal On Game Lands

Hunters are reminded that it is illegal to drive snowmobiles on State Game Lands, except on roads open to public travel, during the upcoming bear and deer seasons.

With interest in snowmobiles mushrooming and sales soaring, some outdoorsmen may have entertained the thought that this would be a means of crossing State Game Lands in big game seasons.

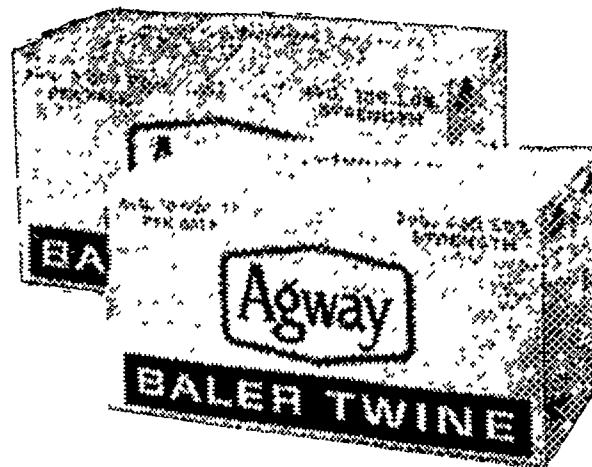

They are advised that to do so is unlawful.

Interdependence Emphasized In 1968 Farm-City Week Observance

Pennsylvania's Farm - City Week observance — scheduled for November 22-28 — will emphasize, more strongly than ever before, the interdependence that exists between rural and urban people, Marion R. Deppen, State Farm-City Week chairman, announced today.

Locally, the Annual Agriculture-Industry Banquet will be held at Lancaster County's new Extension Service director at Farm and Home Center, located

at 1383 Arcadia Road in Lancaster on November 26, starting at 7:00 p.m. To reach the center, turn East from Route 72 on Service Road (next to Christ Craft Sales Building) and proceed two blocks to the Center.

M. M. Smith, Lancaster County Agent, says the importance of this banquet cannot be overstressed. For the eighth time in recent years, the business and agriculture communities will be drawn together as a group to

Lancaster Farming, Saturday, November 23, 1968—19

discuss mutual problems and activities.

Calvin D. Johnson, Special Consultant on Public Affairs for New Holland Division, Sperry-Rand Corporation, will be the principal speaker.

Pennsylvania is linking its celebration this year to the theme, "Farm-City — Partners for Better Living." County committees are organized throughout the state to plan community programs in cities, towns, and rural areas.

"Agriculture has become a billion dollar business in the Commonwealth," Deppen said, "but this is only a small part of the economy compared to the impact of agriculture on other enterprises that depend solely on farms for the products they process and sell."

Agriculture takes more steel, rubber, petroleum, trucks, tractors, and electricity than any other industry, the chairman emphasized. Agribusiness—the food and fiber produced on farms, its transporting, processing, and marketing — involves to varying degrees, 37 percent of Pennsylvania's total labor force.

"The rapid increase in the number of people in the United States has created new and unusual demands for food, housing, industry, and a host of other necessities," Deppen pointed out. "It has led to some concern that land was being gobbled up at such a rapid rate that soon there would be little left on which to produce food."

It is true, he said, that much land is needed for houses, factories, shopping centers, highways, and recreational facilities. In Pennsylvania, three million acres of farmland have been diverted to other purposes since 1950.

More important, it seems to have widened the gap between rural and urban centers and to have separated farm and city people by a much wider margin than land alone.

"In celebrating Farm - City Week, efforts are being made to bring the important issues to the forefront and have the two important segments of our society attempt to solve differences that might exist in local communities," the state chairman emphasized.

LATE FALL HAY CUTTING NEEDS CAREFUL TIMING

You can get a late fall cutting from legume-grass meadows if you time the cutting properly then mulch for winter protection, says Dr. George R. Gist, extension agronomist at Ohio State University.

Meadows should be permitted to grow until late October, Dr. Gist points out. Right now, legumes are storing food reserves in their root systems, and harvesting during this reserve build-up will reduce next year's hay crop. It could even result in almost complete winterkill, especially after a wet season. Food reserves in legume roots are lower after a wet season than after a dry one.

For a late harvest, Dr. Gist advises cutting during the last week of October or the first week of November. This late harvest will keep regrowth and depletion of food reserves at a minimum.

As a mulch following the late harvest, he suggests up to four tons per acre of strawy manure or two tons per acre of old hay, straw or similar material.

● Have You Heard?

(Continued from Page 15)

Phosphate powders have calcium acid phosphate.

Tartrate powder has potassium acid tartrate and tartaric acid.

Combination powders have two acid ingredients—calcium acid phosphate and sodium aluminum sulphate.

Read the label on the can before buying baking powder — all ingredients are listed.

Almost all baking powder used in home baking is double-acting or combination powder.

Baking powders react at different rates of speed because of the different acid ingredients. This means you can't change baking powders among recipes and use the same amounts.

It is essential, Deppen said, to realize that farm and city people, working together, are the most potent power for progress in this nation.

ATTENTION FARMERS...

WHY SHOULD YOU BUY A NEW CASE FARM TRACTOR NOW?

- 25% discount on any New Case tractor on our lot purchased during November.**
- Waiver of Finance Charges until spring.**
- 7% tax investment credit.**
- 20% depreciation allowance on 1968 tax return.**
- Protection from company price increases.**

Meeting Minutes

Pa. Egg Marketing Assn.

President Ben Burkholder opened the meeting by having members introduce their guests who represented poultry intergrators.

The reading of the minutes of the previous meeting was waived but the treasurers report was presented, and accepted. Authorization was granted to transfer promotional funds temporarily to bolster the account balance until 1969 dues are collected.

President Ben Burkholder explained that there may be a time when the Pennsylvania industry will be interested in taking advantage of the Commodities Act. Before action can take place, basic rules must be established, and in order to provide this information a committee made up of Sam Berenson chairman, John Wenger, Tom Smith, and R. W. Sauder were named. President Burkholder expects this committee to go into action soon, as there is a great deal of information to be prepared.

K. M. Souders gave a special report on his attendance at a meeting in Las Vegas. He stated that a Mr. Stein from Maine was chairman of the meeting, and charged the group with the facts that something must be done about the supply of poultry and eggs, and bankers must be alerted to check more closely before making loans for industry expansion. "Mr. Stein suggested that, the Wall Street Journal and Bankers publications should be approached to carry the message".

"Further suggestions were that, fowl should be removed as a result of an option signed by a producer, or eggs must be removed, and should go to breakers".

"Organizations present were Neeme, Swep, Neco, Western Egg Co., and a Mid Western group with a splendid representation from California."

"The objectives as set forth were 1—Communications, 2—Market Participation and Information, 3—Consumer Information, 4—Legislation".

"In order to finance the activity of the new National organization, named UNITED EGG PRODUCERS, INC., it was estimated that five (5) cents per case from participants may be needed. There was a definite conclusion that, the new organization will go ahead, and attempt to avoid any situation that may cause market erosion, as well as develop an effective long and short reporting system".

"Tom Smith of Cloisterdale Farms has been appointed to the Organizational Steering Committee of the new organization, and will plan to attend meetings and keep PEMA members informed. As a matter of fact, the group requested Tom Smith to represent PEMA at a Chicago meeting."

It was properly moved, seconded, and carried that K. M. Souders will continue to represent PEMA at the National level.

"John Wenger reported that the reorganization committee for Pennsylvania has a strong feeling that a united voice would assist the industry in legislative matters. It is estimated that a Board of Directors made up of three members, for a total of 25 - 30 members, from each supporting organization would decide the destiny of the industry, with one or two meeting annually". "In between-regular Board meetings Executive Committee meetings would be held at regular and special times to act in behalf of the in-

dustry. Some consideration is being given to a name change. An effort is being made to sell 400 tickets for the January banquet at \$50 each to raise funds for the Federation operation".

During a general discussion on such subjects as pricing, consumer education, research, and reorganization, a number of ideas were mentioned. It was concluded that unrest exists in the market place on values. Several mentioned the need for strong consumer education, much more research, and careful consideration of all factors in reorganization.

Can Reduce Farm Fires

Destructive farm fires can be reduced as much as 20 percent through proper handling of gasoline, kerosene and other flammable liquids, according to Thomas H. Williams, extension agricultural engineer at the University of Delaware.

Store small amounts of gasoline and kerosene in metal safety cans, says Williams. And make sure that all storage cans are in sound condition and free of leaks. Label all containers clearly to avoid tragic mistakes. Never store flammable liquids in glass jars or other breakable containers.

Allow gasoline engines to cool before refueling, he adds. And wipe away spilled gasoline before starting the engine. Gasoline engines should always be fueled out-of-doors where explosive vapors can't accumulate. It may also be advisable to store gasoline powered equipment in a building separate from barns and other farm structures.

Keep all electrical circuits in good repair in gasoline storage areas, cautions Williams. And remember to keep gasoline and kerosene away from heat and flame.

Be sure to enforce the no-smoking rule when handling

flammable liquids, he adds. And never use gasoline or kerosene to start fires or burn leaves.

When storing large amounts of gasoline above ground, keep all drums outside, at least 40 feet from the closest building.

For a Saturday dinner we had Stouffer's lobster Newburg on a Bays English muffin, boiled carrots, cottage cheese, prunes, a canned pear, and a glass of milk, all preceded by Heaven Hill on-the-rocks.
